

CM G **STEEL CONVERTIBLE SERVICE BODY**

The most customizable service body on the market offers an incredible array of features and options to catch everyone’s attention. With integrated toolboxes, T-Handle latches, D-Bulb weather stripping and optional custom-fitted drawers, you can bring best-in-class efficiency to the jobsite. For overachievers, optional flip-top side pack compartments can be added over the standard aluminum tread plate tops, providing extra chest-high, quick-access toolbox organization for your essential items. Unlike other service bodies, ours come standard with a spray-on bedliner to protect your deck area from the wear and tear of loading cargo.
